

The McCall MacBain Foundation (MMF) is a grant-making organization established in March 2007 by John and Marcy McCall MacBain in Geneva, Switzerland.

Mission

Our mission is to **improve the welfare of humanity through focused grants in health, education and the environment.**

Strategy

With a regional-based approach, our strategy is to develop and encourage best practices and policies in multiple areas related to improving the human condition, with a strong emphasis on improving maternal health, adult education and reducing risks associated with climate change. Our Foundation seeks to invest in both individuals and organizations that share our vision to stimulate local communities and generate local solutions, foster self-empowered decision-making and acknowledge equitable distribution of health and education as a priority. We engage with partners early to ensure a sustainable program and establish a realistic timetable for the termination of MMF funds.

Where we work

The McCall MacBain Foundation currently supports projects primarily in **Liberia, Canada and Europe.**

Why Liberia?

We selected Liberia because of its acute post-conflict situation and desperate need. With strong leadership and sensibly allocated resources, Liberians will choose peace along with a vast improvement in their quality of life. As Liberia resurrects itself from the ashes of 14 years of violent civil conflict, Liberia has the potential to show exemplary progress and social welfare to other countries in the region.

Areas of focus in Liberia:

Maternal Health, Mental Health
Adult Literacy, Training of Health Workers, Teacher Training
Forestry Conservation, Environmental Policy
Capacity Building and Governance

Why Canada and Europe?

With personal and professional affiliations in these regions, the founders of MMF are committed to improving the environment, education and health in Canada and select countries within Europe. Our hope is that leadership in Canada and Europe will strengthen responsible citizenship worldwide.

Areas of focus in Europe and Canada:

Health in Rural Areas, Maternal Health, Health Psychology & Disabilities
Tertiary Education, Secondary Education, Scholarships & Bursaries
Conservation of Forests & Biological Diversity, Environmental Policy & Compliance
